

## Week 6

- More practice, more on the syntax/semantics mapping
- Modification

### Next:

- *The*
- Quantifiers
- (A problem with quantifiers in object position)

PS4 — due next week, September 23?

You can do it now, and are encouraged to do so.

### Exercise

Propose a meaning for *herself/himself*, by considering the following sentences. (Assume that this is one lexical item, ignoring the gender difference; the pronunciation difference between herself vs himself will be a morphosyntactic problem.)

- (1) Sarah likes **herself**.
- (2) Bill hit **himself**.

Pick one sentence and use the Five Step Method for studying the meaning of a part, based on one of these sentences. Make sure it gives you the right results in the other sentence as well.
